Tack Wiping

Specially designed to offer solutions for every dust removal job

Innovative tack **TECHNOLOGY** traps dust quickly and easily

Before re-painting, the car body is cleaned of dirt. No amount of dirt can escape the innovative Chicopee® Tack wipes. Specially designed with a pressure-sensitive tackifier, a gluey substance on the wipe that traps dust effectively without leaving residue on surfaces or on your hands.

Problems

- Different levels of dust removal can be required re-work of the paint process and residue can be left on the body if the wrong product is used
- Low cost tack rags and wipes can leave residue on the surface causing defects and negatively affecting the painting process
- Other tack rags and tack wipes are normally only suitable for one kind of paint, and therefore limit the use and performance

Solutions

- With our tack wipe's unique open structure and tack level, we can help you optimise your process and **reduce the risk of contamination** from the cloth
- Chicopee® Tack wipes are silicone free and have an **excellent dust pick-up** to remove all dust, dirt and lint particles from the surface, leaving a perfect **dust-free surface**
- All our tack wipes are **compatible with every paint type**, both water-based and conventional high solid paints

Polish & Solvent Wiping

Silicone free, soft and supple wipe for critical tasks

Chicopee® Solvent Wipe

The perfect solution for general solvent wiping, degreasing and cleaning of car bodies

Chicopee® Solvent wipes are highly resistant to solvents, and extremely hard-wearing, making it the perfect solution for degreasing and cleaning of car bodies. The strong and durable solvent wipe is up to the task.

The creped fabric ensures optimal degreasing and removal of water and dirt, drying surfaces almost instantly without leaving lint, saving time, money and effort.

- Our wipes are **solvent resistant** and have very low solvent extractables, even with the most aggressive solvent, making it the perfect solution for general solvent wiping, **degreasing and cleaning of car bodies**
- The excellent absorbency of the solvent wipe ensures an **equal application** of the solvent on the car body. The high performance absorbency gives a **"dry at once"** effect when solvent is removed with a dry solvent wipe afterwards
