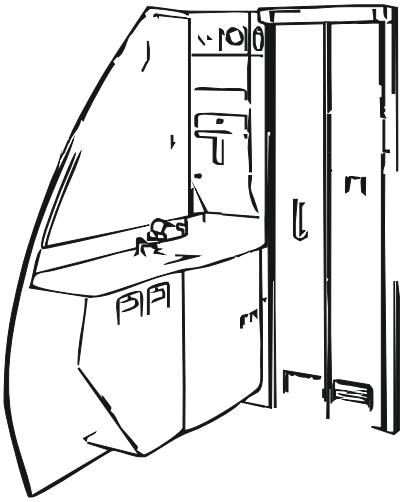
Aeroclean®

T 600 Spray

Fast disinfection
In the aircraft area

Advantages:

- *without alcohol*
- *Pulls away quickly - without streaks*
- *Especially developed for the aviation industry*
- *Safe for plastic surfaces, aircraft windows, Makrolon, acrylic, Plexiglas, etc.*
- *Removes oily and greasy soiling as well as other environmental pollution*
- *Causes no stress cracking*
- *Acts antistatically on the treated surfaces*
- *duftneutral*
- *The product fulfills the requirements for biodegradability*



Aeroclean T 600 Spray is used especially in the areas of cabin, galley, cockpit and lavatory. Cleans and disinfects residue-free and streak-free all plastics, Plexiglas, Macrolon and lacquered metal surfaces. Due to the disinfectants contained, the product is effective against bacterial strains, fungi, sporades as they occur in kitchens and toilets. In addition, good efficacy against viruses (especially hepatitis B and HIV) is achieved.

Application in aircraft:
The product is sprayed onto the surfaces to be cleaned or applied with a sponge / cloth. After a short exposure time, wipe with a dry or damp cloth.

LH Specification
DIN EN 1276 (chemical disinfection & antiseptics)
DIN EN 13704 (test for sporicidal effect)
