## J-Cloth® 3000, the green cleaning solution

Going green is high on the business agenda, especially in the professional cleaning industry. Chicopee is constantly developing new cleaning solutions that are both durable and help your business be sustainable. The latest addition to our successful range of J-Cloth® cleaning wipes, **J-Cloth® 3000**, is a green one. This future-proof non-woven cloth has all the powerful cleaning properties you can expect from a J-Cloth® Lavette AND is the first compostable wipe available in the market.

## Features that favour the environment

The unique design and product features of the J-Cloth® 3000 are based on the world's most renowned cleaning wipe, the J-Cloth® Lavette. Its unique, open, wavy texture enables efficient pick-up of any dirt and makes it easy to rinse, ensuring longer freshness.

## Compostable

In addition, this new cleaning wipe is the first to be compostable, in accordance with the DIN EN 13432 2000-12 standard as tested by an external laboratory and carries the seedling logo, granted by DIN-Certco.

## Biodegradable

A biodegradation test is part of the DIN EN 13432 2000-12 standard. J-Cloth® 3000 fulfils this standard and therefore can be called biodegradable, which means that it does not take a toll on the environment.

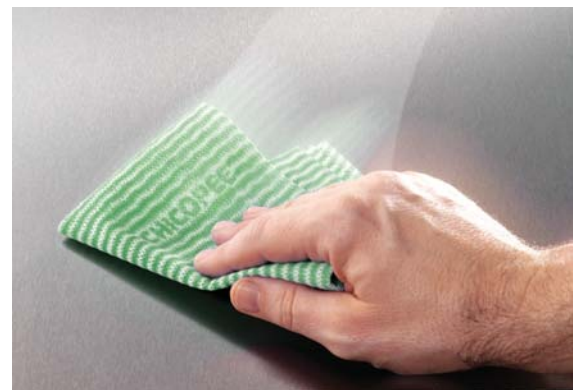

## Food Contact Clearance (FCC)

J-Cloth® 3000 wipes have been independently tested by ISEGA and are fully compliant with the rules and regulations of EC No. 1935/2004 of the European Parliament on materials and articles intended to come into contact with food. This means that J-Cloth® 3000 is completely safe to use, also when it directly or indirectly comes into contact with dry, moist or fatty foodstuffs.

## Hazard Analysis Critical Control Points (HACCP)

J-Cloth® 3000 wipes are designed for maximum hygiene and efficiency. They come in five colours, so that each colour can be designated to a different cleaning area and task. This is the ideal way to prevent cross-contamination and to meet stringent HACCP working conditions.

## All of the features that make J-Cloth® 3000 the most effective and green cleaning solution:

Product feature	Advantage	Benefit
Compostable and biodegradable	Better for the environment at time of disposal Can be used in a closed composting loop	Environmentally aware waste management Has the potential to save landfill
Granted with compostability logo	Environmental awareness made visible	Display sustainable activities internally and externally
Food Contact Clearance*	No contamination in case of direct or indirect contact with food	Safe for health
Open weave structure	Better dirt pick-up due to open holes. More efficient to rinse	More hygienic cleaning Wipe remains fresh longer
Cleaning agent compatible	No reduced efficiency of wipe	No restrictions to cleaning agents used
5 different colours	Supporting HACCP regulations**	Prevention of cross-contamination

\* in compliance with EC 1935/2004 regulation \*\* Hazard Analysis Critical Control Points
