

Copenhagen 17.03.2020

To whom it may concern

Due to the CoViD 19 crisis globally, we are currently experiencing longer lead times from production and severe delays on the transport of our goods. The reason for this is a combination of increased border control between the EU states and the fact that the transport capacity of the European forwarders is under tremendous pressure because of illness, safety precautions and uncertainty. This has effect on our supplies of raw material and finished goods.

I ask our partners and customers to be patient in this crisis. My team is doing their utmost to make operations and logistics run as smooth as possible.

Thank you for your understanding in these difficult times.
