

INTRODUCTION

IPS Surface Cleaners

IPS-Group A/S, previously known as CPS A/S, is a supplier of specialty chemicals, with several patents in solvent chemistry - was nominated to the Danish patent price some years ago.

NEW CHEMISTRY – applying water based, vegetable esters as solvent replacements.

Our vision can best be expressed by following statements:

- product development is based on renewable raw materials such as fatty acids and esters,
- products which are safe to use, safe to store and safe to handle,
- products which are environmentally friendly and easy biological degradable,

IPS Surface Cleaners represent a completely new development in the area of ester-based micro-emulsions, which outperforms most other products when cleaning oil and grease from hard surfaces.

Product description:

IPS Surface Cleaners are a combination of surfactants, ester solvents and coupling agents,

IPS Surface Cleaners are high-performance degreasers for removal of oil and greasy residues,

IPS Surface Cleaners have an exceptional all-round cleaning profile and are a serious alternative to cold-cleaners based on hydrocarbon based solvents and high-alkaline cleaners,

IPS Surface Cleaners come as Ready-for-Use products for hand pump spray applications or as Cleaner Concentrates for dilution on-site
