

AW3

Robotic Solution

Efficient and safe aircraft washing

Technology at work for efficiency and safety

Total concept to end customers

- Technology & services & dry and wet wash cleaning concept

For organisations

- Consultancy
- Customer support & maintenance

For users

- Online training platform: www.aw-cs.com

The Aerowash holistic approach to aircraft exterior cleaning brings added value to its customers.

AW3 is the leader in terms of efficiency, safety, easiness to learn and operate. With the total concept any customer can now have an efficient external cleaning operation.

Our vision is to be the market leader of aircraft washing systems and services. We provide technology and services that streamline and improve processes for our customers. It is with big satisfaction that we can see the impact that our robotic washing systems have had on our Customers' washing time.

Niklas Adler, CEO

Benefits

- Reduced man hours
- Reduced washing time
- Reduced risk of accidents
- High quality washing result
- Online training platform for 24/365 support
- Good ergonomic conditions for operators

AW3

AW3 for more efficient and reliable aircraft washing.

Seamless human & machine interface: easy to learn, easy to operate, safe to use.

Quality washing

- Efficient and flexible brush movement
- Gentle on the aircraft
- Equipped with safety sensors
- Automatic distance adjustment
- Automatic angle adjustment

Efficient operation

- Different washing programs
- Automatic start position
- Automatic folding and unfolding
- Four-wheel drive
- Diesel or battery powered

User friendly

- Intuitive remote control
- Display for operation and monitoring
- Safety features
- Ergonomic design
- Wireless

Consultancy

We are experts in aircraft external cleaning working practices. We can evaluate existing processes and enhance them into more efficient ones.

Training

Aerowash online training platform provides 24/365 support for all users. Interface can be customised to any language. Training videos and instructions provide easy and understandable support for hassle free operations.

Service and support

The Aerowash Service Team is available to provide support as agreed. Our experience from supporting operations around the world gives us the knowhow and tools to assist our customers efficiently and effectively.

AW|DRY

100% Biodegradable Dry Wash Concept

We have a partnership with SOCOMORE, a specialist in aeronautical chemistry which has developed a 100% biodegradable exterior aircraft cleaner solution.

Compared to high pressure cleaners that require hot water rinsing with a high pressure washer, SOCOCLEAN EXTERIOR AIRCRAFT CLEANER used with AW3 offers a dry wash solution with real benefits: 99% water saved during aircraft cleaning; does not require waste water reprocessing according to the site regulations.

AW-DRY system can be shipped, stored, and used without any special considerations. It does not require operators to wear any special protective equipment. It also has a confirmation report of 0% toxicity of dermal, ocular, or ingestion.

Aerowash is in a unique position to offer a superior dry wash chemical and cleaning concept with the AW3.

Key Features

- Concentrated solution for dilution
- Refill format in 5, 210 & 1000 L
- Effective on a large variety of pollutants
- No rinsing – leaves no residue
- Approved by Airbus and Boeing
- AMS 1526 C, Boeing BSS 7432, Airbus AIMS 09-00-002

Key Benefits

- Quick and simple to use
- 100% plant-based
- Ultimate biodegradability of 100 % of the formula
- Zero hazard identification in terms of toxicity and ecotoxicity
- Safe for health – no Personal Protective Equipment needed
- Cleans and leaves a polished finish in one application
- Can be used in wet & hot conditions
- Can be used with express machines or manually
