

Aircraft paint strippers

Callington's Aviation Maintenance Chemicals are sold to over 150 airlines, MRO and ground handling companies around the globe.

Our range of aircraft paint stripping solutions has been formulated to remove efficiently epoxy, polyurethane and other paints systems. It meets the very demanding standards of the industry and includes environmentally friendly and safe solutions, with low VOC, non-flammable, and biodegradable formulations.

Aircraft approved, non-flammable, multi-standard tested solutions.

Manual and airless spraying applications. Adjusted thixotropy for use on vertical or inverted surfaces.

Outstanding efficacy and results on epoxy, polyurethane, and other paint systems.

Formulations with extended shelf life for your operations.

Manufactured across multiple locations worldwide.

Recyclable packaging & biodegradable formulations.

Hydrogen-Peroxide activated

Benzyl alcohol based formulations

Methylene chloride based formulations

Aircraft paint strippers

BENZYL ALCOHOL BASED FORMULATIONS

CH3003

Environmentally Friendly, Acid Activated Aircraft Paint Stripper

- Improved acid-activated aircraft paint stripper.
- Non-flammable, biodegradable, low VOC non-aromatic solvents
- Removal of Epoxy, Polyurethane and other chemically resistant paint systems including primers and base coats.
- Designed for where phenolic types are not recommended.
- No Methylene Chloride, NMP, phenols, amines, nitrites or chromates.
- Application : brushing and airless non atomizing spraying equipment.
- Thixotropic for vertical, inclined and overhead surfaces.
- Slow evaporation.
- 12-month shelf life.

Certification	Item Code	Packaging
BSS 7432 immersion corrosion test except Cadmium Plated Steel and Magnesium.	6300/51	20L
AMS 1376 immersion corrosion test for Aluminium and Titanium alloys.	6300/64	200L
Douglas CSD 1		
ASTM F 945		
ARP 1755		
MIL-R-81903A		

Available: Globally

CH9004

Environmentally Friendly, Hydrogen Peroxide Activated Aircraft Paint Stripper

- Hydrogen peroxide activated aircraft paint stripper
- Non-flammable, biodegradable, low odor, low VOC non-aromatic solvents.
- Epoxy, Polyurethane and other paint systems including primers and base coats.
- No Methylene Chloride, NMP, phenols, amines, nitrites, acids or chromates.
- Application : brushing and airless spraying.
- Thixotropic for vertical, inclined or overhead surfaces.
- Slow evaporation .
- 18-month extended shelf life.

Certification	Item Code	Packaging
BSS 7432	6200/51	20L
Douglas CSD 1	6200/64	200L

Available: Globally

METHYLENE CHLORIDE BASED FORMULATIONS

CH207

Acid Activated Aircraft Paint Stripper (Phenol + Formic Acid)

- Non-flammable, biodegradable, acid activated paint stripper.
- Quick and effective on Epoxy, PU and other chemically resistant coatings, primers and base coats.
- Safe on aluminum alloys, copper, mild and stainless steels.
- Water washable
- Thixotropic: clings to vertical, inverted and inclined surface.
- Application : brush and spray with non atomizing spray equipment.
- 12-month shelf life.

Certification	Item Code	Packaging
MIL-R-81903A	6650/51	20L
	6650/64	200L

Available: Globally

CH8930

Acid Activated Aircraft Paint Stripper (Phenol)

- Non-flammable, biodegradable, acid activated paint stripper.
- Removes rapidly and successfully Epoxy, PU and other chemically resistant coatings, primers and base coats.
- Non-corrosive to aluminum, cadmium, high strength steel and aircraft metal surface.
- Heavy bodied, viscous material for good clinging to surfaces.
- Application : brush and airless spray. Slow evaporation.
- Low odor. Water washable
- 12-month shelf life.

Certification	Item Code	Packaging
Boeing BSS7432	6600/51	20L
AMS 1375B	6600/64	200L
Douglas CSD1, Type III		
MIL-R-25134		
MIL-R-81294		

Available: Globally
