

CONSTIX Swabs for Critical Environments

With more than thirty unique swabs available, Contec's **CONSTIX** swab line offers a solution to any swab application challenge.

CONSTIX Swabs

With more than thirty unique foam, polyester and cotton swabs available, our **CONSTIX** swab line offers a solution to almost any swab

application challenge. Included are sealed foam swabs for general applications, sealed polyester swabs for applications requiring extreme cleanliness and durability, and ultrapure smooth cotton swabs for optics and other residue sensitive applications. Our ESD swabs are ideal for applications that are sensitive to electro-static discharge. Custom swab design and manufacture is also available for qualified applications.

- SF Series swabs feature 100 pore-per-inch sealed open-cell polyurethane foam that is soft yet strong.
- SP Series swabs are made of 100% synthetic fabrics and are available with knit, nonwoven, or microfibre heads. They have great durability and exceptionally low residue and particulate levels.

- SC Series swabs feature high quality Huby®-340 swabs made of long-staple cotton fibres with a methyl-cellulose binder for the tightest, smoothest, and cleanest cotton swabs available. Most SC Series swabs have dual heads for even greater utility.
- SV Series swabs have been additionally processed for use in evaluation of surface cleaning protocols in bio-pharmaceutical applications.
- ESD Series swabs feature handles that are truly static dissipative for quick removal of surface electro-static charges.

Every **CONSTIX** swab has been designed in different lengths, head sizes and materials to meet very specific customer needs. Most are compatible with a variety of solvents and solutions, and with such a wide variety of head and handle combinations, there is probably a standard **CONSTIX** Swab that is ideal for your specific need. If not, just let us know — we make custom swabs for unique applications that in time might even become one of the standard swabs shown here.

CONSTIX Sealed Foam Swabs

Contec's CONSTIX SF Series sealed foam swabs have 100 PPI reticulated polyurethane foam heads for strength and abrasion resistance. This foam is excellent for particle entrapment and retention, making these swabs ideal for applying lubricants and removing excess materials. Compatible with Isopropyl Alcohol.

CONSTIX Cotton Swabs

Made with the longest staple cotton fibres and a simple methyl-cellulose binder, Contec's SC Series Huby®-340 swabs provide very low levels of extractable residue, particles, and fibres. Unlike traditional cotton swabs, these swabs offer the most tightly wrapped heads of any cotton swab available anywhere. This results in cotton swabs that are appropriate for use in some of the most critical applications, including disk drive manufacturing and high-level optical surfaces.

CONSTIX Surface Validation Swabs

Designed for the evaluation of surface cleaning protocols in bio-pharmaceutical industries, our SV Series swabs are made of Polynit polyester fabric that undergoes a proprietary process to reduce Total Organic Carbon levels. For added convenience, CONSTIX Surface Validation Swabs are packaged with only five swabs per autoclavable nylon pouch.
